I hope you can join us on November 11th to support [The Clarity Foundation](#) and its mission to help cancer patients make more informed treatment decisions.

The Clarity Foundation is the only foundation in America dedicated to improving therapeutic options for women with ovarian cancer now. Clarity uses molecular profiling technology to analyze a patient's tumor to determine which drugs are more likely to be effective. By improving the information used in making treatment decisions, their goal is for women with ovarian cancer to live longer, healthier lives.

[The Clarity Foundation](#) is a 501(c)(3) not-for-profit helping women with the most deadly women's cancer battle their disease through molecular profiling. The foundation is a group of scientists, physicians and volunteers who feel passionately about changing the paradigm for ovarian cancer treatment, and the treatment of other cancers. We hope you will join us in our support of Clarity's mission to advance a personalized approach to cancer treatment.

Thank you,
